Mid-Term Project Brief — Travel Destination Page

Technologies Allowed: HTML, CSS, Bootstrap only (no JavaScript)

Project Goal

Create a **responsive landing page** for a travel destination (real or fictional) that introduces visitors to the place and highlights **Attractions**, **Food**, and **Culture**.

Page Structure

1. **Header / Hero Section**
   o **Bootstrap Carousel** instead of a single banner image
   o At least **3 rotating images** of the city/place
   o Each slide should have:
      ▪ City name in large heading (centered text)
      ▪ A short tagline (e.g., *"The City of Dreams"*)
2. **Navigation (Optional but encouraged)**
   o Simple Bootstrap navbar with links that scroll to different sections (href="#section-id").
3. **Attractions Section**
   o Heading: *"Top Attractions"*
   o Bootstrap **cards** for each attraction:
      ▪ Image of the attraction
      ▪ Short description (2–3 lines)
4. **Food Section**
   o Heading: *"Famous Foods"*
   o Bootstrap **cards** for food items with images:
      ▪ Dish name
      ▪ Short description
5. **Culture Section**
   o Heading: *"Local Culture"*
   o Bootstrap cards or image + text layout describing traditions, festivals, or customs
6. **Footer**
   o City name and year
   o Simple credit text (e.g., "Designed by [Your Name]")

Design Requirements

- **Use Bootstrap Grid** for responsive layouts (3 cards per row on desktop, 1 per row on mobile).
- **Use Bootstrap Utilities** for spacing, colors, and typography.
- **Use Images** relevant to each section (royalty-free or placeholders).
- **Color Scheme** must be consistent throughout.
- **Font Choice** can be Bootstrap default or Google Fonts.

Project Deliverables — Travel Destination Page

1. **HTML File(s)**
   o One main HTML file (index.html) containing the full page.
   o Proper semantic structure: <header>, <section>, <footer>.
2. **CSS File(s)**

- o Custom CSS file (style.css) for additional styling beyond Bootstrap.
        - o Should include colors, fonts, spacing, hover effects, etc.
3. **Images**
        - o At least **3 images** for the Bootstrap carousel in the header.
        - o At least **2–3 images per section** (Attractions, Food, Culture).
        - o Images should be optimized for web (not huge in size).
4. **Bootstrap Implementation**
        - o Use Bootstrap 5 (via CDN or downloaded files).
        - o Carousel for the header
        - o Cards for each section
        - o Grid or flex layout for responsiveness
5. **Submission Format**
        - o Zip the folder and submit as a single .zip file.
        - o Ensure all links to CSS and images are relative (so it works when unzipped).
6. **Important**
        - o The webpage should be responsive.
        - o The HTML structure should be semantic.
        - o The code should be clean.

Grading Criteria (Total: 15 Marks + Bonus)

Criteria	Marks
Proper HTML structure	3
Responsive Bootstrap grid use	4
Carousel implemented correctly	3
Clear, consistent design & colors	3
Images & text relevance	2
Total	**15**
Bonus Marks (Outstanding work)	**+5**
